Pet Adoption & Shelter Management System

Function and Non-functional Requirements

Req ID	Type	Description	Priority	Acceptance Criteria	Rationale (short)	Comments
FR-001	Functional	The system shall allow Shelter Staff to log animal vaccination and medical intake records and update the animal availability status to "Ready for Adoption."	High	When verified vaccination and medical intake records are entered, the animal record is updated and its availability status becomes "Ready for Adoption" only when it is eligible for adoption.	Maintains accurate animal medical and adoption status.	Directly based on the given FR-001.
FR-002	Functional	The system shall allow an Adoption Applicant to fill in and submit the required adoption questionnaire along with an adoption application.	High	After all the required details are entered, the application can be submitted and is saved in the system for staff to review.	Helps the shelter collect the information needed before considering an applicant.	Based on the adopter screening mentioned in the problem statement.

Req ID	Type	Description	Priority	Acceptance Criteria	Rationale (short)	Comments
FR-003	Functional	The system shall allow Shelter Staff to check adoption applications and update their status as Approved or Rejected .	High	Staff can open a submitted application, make a decision, and the updated status is shown in the application record.	Gives shelter staff a way to keep track of adoption decisions.	Application must be linked to the selected animal.
FR-004	Functional	The system shall allow Shelter Staff to record when an animal is placed in a foster home and maintain the details of the placement.	High	When a foster placement is added, the system records the animal, foster home, start date, and placement status. Staff should also be able to update the placement when the animal leaves the foster home.	Helps staff keep track of animals staying in foster homes.	Based on the foster home placement timelines mentioned in the problem statement.
FR-005	Functional	The system shall allow Adoption Applicants to search for available animals and narrow the results using details such as species,	High	When one or more search filters are selected, the system displays only available animals matching the selected criteria.	Makes it easier for applicants to find an animal that suits their needs.	Supports multi-attribute animal search.

Req ID	Type	Description	Priority	Acceptance Criteria	Rationale (short)	Comments
		age, breed, and whether the animal is good with kids.				
NFR-001	Non-functional	The pet search catalog shall support multi-attribute filtering using Species, Age, Breed, and Good with Kids with a page response time of less than 200 ms.	High	Benchmark testing confirms that filtered search responses are below 200 ms under the specified test conditions.	Ensures fast and responsive animal searching.	Directly based on the given NFR-001.
NFR-002	Non-functional	The system should protect animal medical details and applicant information so that only users with the required access can view or change them.	High	A user without the required permission should not be able to open or modify restricted records. Shelter Staff should be able to access the records needed for their work.	Some of the information stored by the shelter should not be accessible to everyone.	Covers authentication and role-based access control.
